Ideas for ASN’s Sustaining Members?
The Sustaining Members are represented in the Society by a Sustaining Member Committee. The members of this standing committee help to provide visibility within ASN to matters of interest to industry by exchanging ideas and providing support for the society’s activities.

Interested in Adding Your Support to the Society?
Your unrestricted contribution is used to support programs and awards that help the association fulfill its mission: to be the leading nutrition research society dedicated to improving the health of individuals and populations worldwide.

The Nutrition Science Collection: High Impact Nutrition Research at an Exceptional Value

Advances in Nutrition
This newly launched international review journal joins the ASN family of esteemed journals. Advances in Nutrition meets the growing demand for a prestigious, high-profile publication that gathers, synthesizes, and explains the current state of knowledge in all aspects of the field of nutrition.

The American Journal of Clinical Nutrition
With a 2010 Impact Factor of 6.6 and a 5-year Impact Factor of 7.5, The American Journal of Clinical Nutrition is the highest ranked and most cited research journal in the field of nutrition.

The Journal of Nutrition
With a 2010 Impact Factor of 4.3 and a 5-year impact factor of 4.4, The Journal of Nutrition publishes research reports on a broad range of topics fundamental to the study of nutrition. Published since 1928, JN is the second most cited journal in the field.
The Best of Clinical Nutrition 2013
Highlights from the American Society for Nutrition’s Scholarly Journals

Now with enhanced content! Summaries of each research report outlining potential applications and takeaways for your practice are included in the 2013 volume. These summaries provide added value and analysis of what the study means in practical terms.

As popular interest in nutrition and wellness increases, this collection features key updates on hot topics like obesity, chronic disease, pregnancy, and dietary supplements. The Best of Clinical Nutrition includes critical discoveries made in these areas — making it a necessary reference for you to own. An accurate assessment of current knowledge in nutrition emerges from this collection, which is invaluable for clinicians, dietitians, and policy makers.

Studies featured in the 2013 edition include:
• Calcium supplements and cardiovascular disease risk
• Sustainable diets: can we reduce greenhouse gas emissions by eating a healthy diet?
• Prebiotics and the health benefits of fiber
• Salmon consumption during pregnancy and human breast milk
• Lifestyle determinants of the drive to eat
