Reviews

457 Whole Food versus Supplement: Comparing the Clinical Evidence of Tomato Intake and Lycopene Supplementation on Cardiovascular Risk Factors
Britt M. Burton-Freeman and Howard D. Sesso

486 Comparison of Dietary Intake and Physical Activity between Women with and without Polycystic Ovary Syndrome: A Review
Annie W. Lin and Marla E. Lujan

497 Hypercholesterolemia Induces Adipose Dysfunction in Conditions of Obesity and Nonobesity
David Aguilar and Maria Luz Fernandez

503 Vitamin E Inadequacy in Humans: Causes and Consequences
Maret G. Traber

515 Polyphenols and the Human Brain: Plant “Secondary Metabolite” Ecologic Roles and Endogenous Signaling Functions Drive Benefits
David O. Kennedy

ASN 2014 Annual Meeting Symposium Summaries

534 History and Impact of Nutritional Epidemiology
David H. Alpers, Dennis M. Bier, Kenneth J. Carpenter, Donald B. McCormick, Anthony B. Miller, and Paul F. Jacques

537 The Future of Nutrition Research at the National Institutes of Health
Cindy D. Davis and Sarah Ohlhorst

541 Caffeine-Containing Energy Drinks: Beginning to Address the Gaps in What We Know
Barbara C. Sorkin and Paul M. Coates

544 Neurocognition: The Food–Brain Connection
James O. Hill, Kent Berridge, Nicole M. Avena, Hisham Ziauddeen, Miguel Alonso-Alonso, David B. Allison, Naiman A. Khan, and Michael Kelley

547 The Science of Cocoa Flavanols: Bioavailability, Emerging Evidence, and Proposed Mechanisms
Jeffrey B. Blumberg, Eric L. Ding, Richard Dixon, Giulio Maria Pasinetti, and Francisco Villarreal

550 Beyond Blood Pressure: New Paradigms in Sodium Intake Reduction and Health Outcomes
Janet C. King and Kristin J. Reimers

553 Insights and Perspectives on Dietary Modifications to Reduce the Risk of Cardiovascular Disease
David J. Baer, Beth H. Rice Bradley, Penny Kris-Etherton, Andrew Mente, and Marcia de Oliveira Otto

556 Dietary Whole Grain–Microbiota Interactions: Insights into Mechanisms for Human Health
Nancy L. Keim and Ray J. Martin

558 It’s All about Balance: Cellular Responses to Nutrients and Development of Disease
Maria Hatzoglou, Martin D. Snider, and Padma Maruvada

561 Novel Mathematical Models for Investigating Topics in Obesity
John A. Dawson, Kevin D. Hall, Diana M. Thomas, James W. Hardin, David B. Allison, and Steven B. Heymsfield

563 Unscientific Beliefs about Scientific Topics in Nutrition
Andrew W. Brown, John P. A. Ioannidis, Mark B. Cope, Dennis M. Bier, and David B. Allison
International Breast Cancer and Nutrition: A Model for Research, Training and Policy in Diet, Epigenetics, and Chronic Disease Prevention
Connie M. Weaver, Dorothy Teegarden, Ailsa Welch, Nahla Hwalla, and Sophie Lelièvre

Are Biofortified Staple Food Crops Improving Vitamin A and Iron Status in Women and Children? New Evidence from Efficacy Trials
Fabiana F. De Moura, Amanda C. Palmer, Julia L. Finkelstein, Jere D. Haas, Laura E. Murray-Kolb, Michael J. Wenger, Ekin Birol, Erick Boy, and Juan Pablo Peña-Rosas

It's Alive: Microbes and Cells in Human Milk and Their Potential Benefits to Mother and Infant
Lars Bode, Mark McGuire, Juan M. Rodriguez, Donna T. Geddes, Foteini Hassiotou, Peter E. Hartmann, and Michelle K. McGuire

Applications of Complex Systems Science in Obesity and Noncommunicable Chronic Disease Research
Youfa Wang, Hong Xue, Layla Esposito, Michael J. Joyner, Yanee Bar-Yam, and Terry T.-K. Huang

Review from ASN EB 2014 Symposium
What Determines Human Sodium Intake: Policy or Physiology?
David A. McCarron
