Ideas for ASN's Sustaining Partners?
The Sustaining Partners are represented in the Society by a Sustaining Partner Roundtable. The members of this roundtable help to provide visibility within ASN to matters of interest to industry.

Interested in Adding Your Support to the Society?
Your unrestricted contribution is used to support programs and awards that help the association fulfill its mission to be the leading nutrition research society dedicated to improving the health of individuals and populations worldwide.

American Society for Nutrition
Excellence in Nutrition Research and Practice

ASN is home to more than 5,000 members who work in academia, practice, government and industry across 80 different countries.

We reached 5,000 members in 2013!

Half a million in scientific awards, scholarships, grants, travel awards and honoraria to support the best and brightest of our field.

All 15 experts on the Dietary Guidelines Advisory Committee are ASN members.

8 Ways ASN Members Save

1. Members Save $175
Experimental Biology Registration Fee

2. Members Save $560
Free Online Journal Access to AJCN, JN and AN

3. Members Save $210
Print Journal Subscription to The American Journal of Clinical Nutrition

4. Members Save $210
Print Subscription to The Journal of Nutrition

5. Members Save $100
Advances & Controversies in Clinical Nutrition Registration Fee

6. Members Save $75
Waived Manuscript Submission Fees

7. Members Save $40 per page
Discounted Page Charges

8. Members Save $54
Print Subscription Rate for Nutrition Today

$1,424 in Total Cost Savings for Members!
ASP’s Annual Compilation Returns!

ASP’s yearly compendium features the most influential articles published within the past year in our selective, highly ranked journals: The American Journal of Clinical Nutrition, The Journal of Nutrition, and Advances in Nutrition.

The Best of Clinical Nutrition

We have seen general interest in nutrition reach record levels; never before has science-based information about nutrition and wellness been more important. The research within supports clinicians when considering individualized treatments for nutrition-related health concerns such as obesity, cancer, and chronic disease. Educators and policy makers will also find the compendium useful in staying abreast of critical discoveries.

Summaries of each research report provide added value and analysis of what the study means in practical terms. A scientific abstract and references for each research report assist in discerning useful takeaways.

The 2014 edition of The Best of Clinical Nutrition features studies on:

• Low vitamin D concentration exacerbates adult brain dysfunction
• Dietary fats and health: dietary recommendations in the context of scientific evidence
• Docosahexaenoic acid (DHA) supplementation and memory/reactive time in young adults
• Usefulness of fat and lean body mass index (BMI) reference curves in children and adolescents
• Amount of protein intake required for body weight loss and weight maintenance
• Fruit and vegetable intakes and lower risk of bladder cancer among women
