Reviews, including:

- Food groups and hypertension
- Nutritional factors and cognitive function
- Yogurt and cardiometabolic diseases
- Effects of resveratrol through the gut microbiota
- Dietary strategies to reduce environmental impact

4th International Vitamin Conference—Three Reviews Focused on This Area of Research

Review from ASN EB 2017

- Measurement errors in dietary assessment in low-income countries

Nutrient Information:

- Vitamin A
Ideas for ASN’s Sustaining Partners?
The Sustaining Partners are represented in the Society by a Sustaining Partner Roundtable. The members of this roundtable help to provide visibility within ASN to matters of interest to industry.

Interested in Adding Your Support to the Society?
Your unrestricted contribution is used to support programs and awards that help the association fulfill its mission to be the leading nutrition research society dedicated to improving the health of individuals and populations worldwide.

For more information, please visit www.nutrition.org/industry

The Highest Commitment to Nutrition
Industry organizations with the highest level of commitment to the nutrition profession are recognized as ASN Sustaining Partners. ASN is proud to partner with these companies to advance excellence in nutrition research and practice.

Nutrition Science Collection

THE MOST IMPACTFUL TITLES IN NUTRITION RESEARCH

Leading the field in citations, influence, and value

The American Society for Nutrition (ASN) proudly offers the most important sources of nutrition research and reviews in the world, including the first and the most prominent journals in our field. Together they make up the Nutrition Science Collection, publishing an array of research that reflects the direction and shapes the future of global nutrition.

The Nutrition Science Collection includes:

- **The Journal of Nutrition**, the first scientific journal created solely for publication of nutrition research, with a reputation for rigorous peer review and a decades-long legacy of publishing highly original research whose findings directly influence health and nutrition policy worldwide.

- **The American Journal of Clinical Nutrition**, the highest ranked peer review journal in the field, ranked one of the most influential publications in biology and medicine over the past century by the Special Libraries Association, featuring basic and clinical studies regarding human nutrition from researchers in more than 90 countries.

- **Advances in Nutrition**, delivering reviews of the most current, reliable evidence on all facets of nutrition, with a diverse, global point of view and a rapid submission-to-publication schedule to keep pace with the accelerating demand for the latest breakthroughs in nutrition science.

- **Current Developments in Nutrition** new in 2017, an open-access journal publishing a broad scope of nutrition research to extend knowledge of nutrition through basic, multi-disciplinary, and clinical research to improve public health and clinical practice worldwide.

Researchers, policy makers, and practitioners rely on ASN’s Nutrition Science Collection to keep up with:

- Cutting-edge research in the rapidly evolving field of nutrition science and its clinical implications
- The latest findings linking nutrition to optimal health and well-being
- The role of nutrition in the prevention of diseases and health disorders
